Major changes of the TLD8

- There were some minor changes in some indicators and verifiers in TLD8
- Proposed to set up a system in place for operation of CITES species which may include:
 - Inventory: to identify the CITES species
 - Pre-harvesting plan: to identify the CITES species
 - Harvesting monitoring for conversion areas: to record the CITES species
 - Timber auction of confiscated timber and conversion areas: CITES species listed in log list for auction
 - Sale documents from auction (CITES species are specified in documents).
 - Input form from log landing III including the imported timber.
 - Output from log landing III and loading certificate.
 - CITES permit.
- **Gaps:** Revision of relevant regulations to cover the CITES for timber species.
- Include introduction, glossary and acronym to the TLD8
